I Preface

This documentation explains the usage of the Laevanaak Language as of the government of Enkavak for the purpose of increasing literacy, understanding and studies on it. The Ministry of Education hopes for this documentation to be a basis for a more standardized Laevanaak for both the usage in politics and educational institutions.

Laevanaak is the most dominant language throughout the islands of the Atlantic Sea as well as different remote locations and cities. It is used officially by the governments of Enkavak and Gevsaksavli and the international organisations NATO and the Gulf Union. The assigned language code is 'LVK' as issued by the United Nations Office of Codes and Document Standardization or 'LV' as used by the Enkavak government or other official atlantic institutions.

Laevanaak as well as related languages like Kaarratosk or Navnaak is part of the Laevanaic Language Family. More specifically the dialect described herein is referred to as Standard Modern Laevanaak, which is mainly spoken on islands such as Gasangak or Njismgak and parts of Alnaaemak. Laevanaak has a high dialectal diversity due to the immediate geography consisting of nearly only ocean and its islands, which separated speakers for centuries yielding several distinguished languages and dialects.

Over the span of the different time periods the Atlantic people had contact with Graecic, Pisco-Imerchali, Saxo-Syzkynic and most recently Kozramvan people which helped shaping the Laevanaak Language to what it is today. In modern times the contact to other cultures has expanded due to the globalisation with the most influencing being Kyawcenni, German, Kozramva and Mosici.

II Phonology and Orthography

II.1 Common and Uncommon Sounds

The most common sounds in Laevanaak can be represented by the Laenavaak script and are found in the most common words. Less common sounds are represented in other scripts depending on the dialect.

Figure 1: Laevanaak vowels

The different vowels are based on two main vowels in the standard dialect and are only differentiated by length most of the time. In most of the dialects, the short version of /ε/ can be represented by /ɪ/ and is more differentiated than in the standard dialect. In a similar manner can /e/ merge with /a/, be differentiated or even split into more different vowels depending on the dialect.

	Labial	Alveolar	Velar	Glottal
Stop			/k/ /g/	/ʔ/
Nasal	/m/	/n/	/ŋ/	
Fricative	/v/	/ɸ/		
Affricative		/tɸ/		
Approximant		/l/		

Table 1: Laevanaak Consonants

In some instances or dialects can certain sounds be pronounced differently. /k/ can become [q], /v/ can become [f] or /ɸ/ can become [ɕ]. The lateral alveolar affricate is mostly used in loanwords and only rarely occurs in names or native nouns. In some dialects it can be pronounced as [d]. In most cases if a consonant is doubled, it can be pronounced as if gemminated, which also sometimes applies to vowels. So for example 𐌶𐌵𐌹𐌺𐌻𐌾𐌰 /ʔe.ɸl.lak/ (toe) would be [ʔe.ɸl:.ak] or 𐌶𐌵𐌹𐌺𐌻𐌾𐌰 /vɛ.ɸk/ (stars) would be [vɛ:k].

Every vowel is always preceded by a consonant. If not specified, that consonant is simply a glottal stop.

II.2 Native Script

The native Laevanaak script called Laenavaak (𐌌𐌔𐌕𐌖𐌔𐌕𐌔𐌕𐌔𐌕𐌔𐌕𐌔𐌕𐌔𐌕𐌔𐌕) is an alphabet with 16 letters of which are 5 vowels and 11 consonants.

Letter	Translit.	Name	Name (English)	IPA
𐌌	e	𐌌𐌔𐌕	Ega	/ɛ/
𐌔	l	𐌔𐌕𐌔𐌕	Lima	/l/
𐌕	ŋ	𐌕𐌌𐌔𐌕𐌔	Ngeso	/ŋ/
𐌕	h	𐌕𐌌𐌔𐌕	Ahmo	/ʔ/
𐌕	b	𐌕𐌌𐌔𐌕𐌔	Bnevo	/v/
𐌕	u	𐌕𐌌𐌔𐌕𐌔	Seqi	/e/, /ɛ/
𐌕	v	𐌕𐌌𐌔𐌕𐌔	Valo	/v/
𐌕	k	𐌕𐌌𐌔𐌕𐌔𐌕	Kakigo	/k/
𐌕	q	𐌕𐌌𐌔𐌕𐌔𐌕	Qakigo	/k/, /g/, /l/
𐌕	i	𐌕𐌌𐌔𐌕𐌔𐌕	Vingo	/ɛ̃/
𐌕	n	𐌕𐌌𐌔𐌕𐌔𐌕	Nebo	/n/
𐌕	a	𐌕𐌌𐌔𐌕𐌔𐌕	Aglio	/a/
𐌕	s	𐌕𐌌𐌔𐌕𐌔𐌕	Smo	/ʔ/
𐌕	g	𐌕𐌌𐌔𐌕𐌔𐌕	Gego	/g/
𐌕	m	𐌕𐌌𐌔𐌕𐌔𐌕𐌔𐌕	Mim or Mimo	/m/
𐌕	o	𐌕	O	/e/

Table 2: Laenavaak Script

If the letter Ahmo is preceded by a vowel while not preceding a vowel itself, it turns the vowel into a stuttered vowel where the vowel is repeated once with a glottal stop in between. In some dialects the letters Bnevo, Seqi and Valo are pronounced as /b/, /v/ or /ə/ and /f/ respectively, altho Seqi is mostly used in grammar and can only rarely be found in names or proper words. A double Aglio represents a long /a/ and any /v/ immediately following a /ʔ/ is silent.

II.3 Foreign Script

Most dialects use a foreign script for names and loanwords. The one used in the standard dialect has 27 consonants of which 21 are used and 28 vowels of which 16 are used. Other systems used are the greek alphabet or the latin alphabet.

Sound	Standard	Greek	Latin
/k/	𐌕, 𐌕	Κκ	Kk, Qq
/g/	𐌕, 𐌕	Γγ	Gg
/ʔ/	𐌕, 𐌕	Χχ	Hh, Xx
/m/	𐌕	Μμ	Mm
/n/	𐌕, 𐌕	Νν	Nn
/ŋ/	𐌕	Γγ γγ	Ŋŋ, Ng ng
/v/	𐌕, 𐌕, 𐌕	Ββ, Φφ	Ff, Vv, Bb

/ʈ/	ᳵ, ᳶ, ᳷, ᳸, ᳹	Θθ, Σσς	Ss
/tʰ/	ᳺ, ᳻	Δδ, Ζζ, Ξξ, Ττ	Tt, Dd
/l/	᳼, ᳾, ᳿, ᳽	Δδ, Λλ, Ρρ	Dd, Ll, Rr
/ɛ̃/	᳽, ᳾, ᳿	Ιι	Ii, Yy
/ε/	᳽, ᳾	Εε, Ηη	Ee
/a/	᳽, ᳾	Αα	Aa
/a:/	᳽	Αα αα	Aa aa
/e/	᳽, ᳾, ᳿, ᳽, ᳾, ᳿, ᳽, ᳾	Οο, Ωω, Υυ	Oo, Uu

II.4 Punctuation

There is a lot of different symbols in Laevanaak used for punctuation and markings.

Middledots (◌◌) are placed between words to differentiate between them. They are only used if there is not already another symbol.

Full Stops (◌) are placed at the end of a sentence to conclude it.

Commas (◌) are placed before a Subordinate, Coordinate clause or an AcI. If the clause does not conclude the sentence, it is also followed by a comma.

Interjection Markers (◌) are used to mark full sentences or phrases that are placed within another sentence to add more information. They are placed before and after that interjected sentence or phrase instead of full stops or middledots. Interjection markers are also used in date formatting.

Quote Markers (◌) are placed before and after quotes.

Abbreviation Markers (◌) are placed after an abbreviation.

Name Markers (◌) are placed before and after names to mark them as such.

Additionally there are still other symbols like the **Reverse Comma** (◌), the **Address Marker** (◌) or the **Triple Dot Marker** (◌◌◌) used in specific situations or to replace other symbols in certain cases.

III Syntax

III.1 Wordtypes

There are 10 parts of speech in Laevanaak that are used to express different types of concepts. These are article, noun, verb, adjective, adverb, pronoun, numeral, conjunction, preposition and particle. Nouns are marked with articles with the exception of pronouns, numerals or names. A particle can be placed anywhere inside any sentence to enhance the meaning of the whole sentence or the given part of the sentence or they can replace a whole clause entirely.

Nouns, pronouns, articles and **adjectives** are declined in case and number while adjectives additionally decline in comparison.

Verbs conjugate in mood, person and number. Temporal marking is done with adverbs.

III.2 Basic word order

The word order of a main clause is SOV(O) where the second O is used as a locative.

The subject starts with the article and ends with a noun. Any adjective describing the noun is placed between article and noun. Any genitive object describing the noun is placed after the noun. An object of the sentence has the same structure with the difference that article, adjectives and the noun are declined as nominative in a subject and either genitive or objective in an object depending on whichever the verb is requiring.

Adverbs or prepositions are placed before the verb, while the required noun of a preposition is placed after the preposition. The verb is conjugated so the number and person match with the subject.

An adjective or an AcI can serve as object of the sentence if the verb requires. The structure of an AcI is as well SOV(O) with the difference that article, noun and adjectives of its subject are in the objective.

ᄁᄁᄁ	ᄁᄁᄁ	ᄁᄁᄁᄁᄁᄁᄁᄁ	ᄁᄁᄁ	ᄁᄁᄁ	ᄁᄁᄁ	ᄁᄁᄁᄁᄁᄁᄁᄁᄁᄁ
/mak	nan	ke.lın.ʔan	mag	ʔı.ve	man	ke.na.vek.va/
1S-NOM	ART	friend-OBJ	1S-GEN	be-INF	1S-OBJ	want-1S

'I want my friend to be with me.'

III.3 Subordinate and Coordinate Clauses

Laevanaak has four kinds of sub- and coordinate clauses, which are conjunctive, subjunctive, nominal relative and objectal relative clauses.

Conjunctive and **Subjunctive** clauses are subsequent to the con- or subjunction which is placed after the main clause. The clauses in a conjunctive sentence are interchangeable and have an equal weight on semantics.

The conjunction 'ᄁ' can be used to combine two clauses to one sentence without linking the semantics:

ᄁᄁᄁᄁᄁ	ᄁᄁᄁᄁᄁᄁᄁᄁᄁᄁ	ᄁᄁᄁᄁᄁᄁᄁ	ᄁᄁᄁᄁᄁ	ᄁ	ᄁᄁᄁᄁᄁ	ᄁᄁᄁᄁᄁᄁ	ᄁᄁᄁᄁᄁ
/ʔε.nək	ʔε.ʔı.na.ka.ʔεk	ne.me.nı.ak	ʔı.vım	ʔa	ʔε.nək	ve.vek	ka.va.ʔak
INDEF	dog-PL-NOM	lively	be-3PL	CNJ	INDEF	fish-PL-NOM	wet

ᄁᄁᄁᄁᄁ
ʔı.vım/
be-3PL

'Dogs are lively and fish are wet.'

IV Morphology

Laevanaak uses suffixes for declension, conjugation and other usages. Nouns, pronouns, articles and adjectives are declined and verbs are conjugated.

IV.1 Declension

IV.1.1 Nouns

Nouns are declined in case and number in two different patterns. Nouns ending in ‘-a’ are declined according to the A-Declension and nouns ending in ‘-u’ are declined according to the H-Declension.

	Singular	Plural
Nominative	-ᐱᐅ /ak/	-ᐱᐅ /εk/
Genitive	-ᐱᐅ /ag/	-ᐱᐅ /εg/
Objective	-ᐱᐅ /aŋ/	-ᐱᐅ /εŋ/

Table 3: A-Declension

	Singular	Plural
Nominative	-ᵛᵛᵛ /aʔak/	-ᵛᵛᵛᵛ /εʔεk/
Genitive	-ᵛᵛᵛᵛ /aʔag/	-ᵛᵛᵛᵛᵛ /εʔεg/
Objective	-ᵛᵛᵛᵛᵛ /aʔaŋ/	-ᵛᵛᵛᵛᵛᵛ /εʔεŋ/

Table 4: H-Declension

The nominative is used for the subject of a clause, the object of a clause if the verb is a form of to be and for names and calling them.

The objective can be used as a direct or indirect objective case as object of a clause or the subject of an Acl. It can also be used as a locative if placed after a verb.

The genitive can be used to describe a noun if placed after it, in which case it can be locational, partitive or most commonly possessive. It can also be used as a genitive object depending on the verb. It can also rarely be used informally or in dialects after a verb similarly to an objective for a direction marker.

IV.1.2 Adjectives

Adjectives are also declined in the same two declensions with the same endings depending on the ending. Additionally they can be declined in comparison with prefixes.

Negative	Positive	Comparative	Superlative
ḡid- /ɣe/	-	ḡid- /te/	ḡid- /ge/

Table 5: Adjective Comparison

The suffix ‘**ᠠᠳᠠᠰᠤ**’ /a.ᠳᠠ/ for the A-Declension or ‘**ᠠᠳᠠᠰᠤᠬᠤ**’ /a.ᠳᠠ.ᠳᠠ/ for the H-Declension are added to use the word as an adverb. ‘**ᠭᠠᠳᠠᠰᠤ**’ /ga.ᠳᠠk/, lit. ‘good’, will become ‘**ᠭᠠᠳᠠᠰᠤᠬᠤ**’ /ga.ᠳᠠ.ᠳᠠ/, lit. ‘goodly’ or ‘in a good way’.

The suffix ‘**ᠠᠨᠠᠨᠠᠨ**’ /a.ɬem.n/ for the A-Declension or ‘**ᠠᠨᠠᠨᠠᠨᠠ**’ /a.ʔa.ɬem.n/ for the H-Declension can be placed after the adjective and followed by a usual suffix of the A-Declension to create a passive form of an adjective. This can be used to create a participle passive form of a verb. For example ‘**ᠭᠡᠨᠠᠨᠠᠨᠠᠨᠠᠨᠠᠨᠠᠨ**’ /kə.na.vek.ve.ma.ɬem.nak/ from the verb for to

IV.3 Pronouns

IV.3.1 Personal Pronouns

Laevanaak has the classic 3 person pronoun system of which all are declined regularly in number and case.

		Nominative	Genitive	Objective
Singular	1st	ᠮᠠᠭ /mak/	ᠮᠠᠭ /mag/	ᠮᠠᠭ /maj/
	2nd	ᠮᠠᠭᠠ /mavk/	ᠮᠠᠭᠠ /mavg/	ᠮᠠᠭᠠ /maj/
	3rd	ᠮᠠᠭᠠᠭ /mamk/	ᠮᠠᠭᠠᠭ /mamg/	ᠮᠠᠭᠠᠭ /maj/
Plural	1st	ᠮᠠᠭᠠᠭᠠ /mek/	ᠮᠠᠭᠠᠭᠠ /meg/	ᠮᠠᠭᠠᠭᠠ /maj/
	2nd	ᠮᠠᠭᠠᠭᠠᠭ /menvk/	ᠮᠠᠭᠠᠭᠠᠭ /menvg/	ᠮᠠᠭᠠᠭᠠᠭ /maj/
	3rd	ᠮᠠᠭᠠᠭᠠᠭᠠ /memk/	ᠮᠠᠭᠠᠭᠠᠭᠠᠭ /memg/	ᠮᠠᠭᠠᠭᠠᠭᠠᠭ /maj/

Table 7: Personal Pronouns

There is no explicit possessive, instead the genitive is used regularly. This use of a genitive will not affect the declension, which means no number agreement is needed between the possessive (genitive) and the possessed.

IV.3.2 Indefinite, Demonstrative and Interrogative Pronouns

Similar to personal pronouns demonstrative, indefinite and interrogative pronouns are regularly declined in number and case. Usually the equivalent other forms are created from the indefinite form with simple affixes.

	Indefinite	Demonstrative	Negative	Interrogative
Animate	ᠮᠠᠭᠠᠭ /ʔanjak/	ᠮᠠᠭᠠᠭᠠᠭ /gvanjak/	ᠮᠠᠭᠠᠭ /ʔak/, ᠮᠠᠭᠠᠭᠠᠭ /ʔanjak/	ᠮᠠᠭᠠᠭᠠᠭ /ʔinjak/
Inanimate	ᠮᠠᠭᠠᠭ /ʔamak/	ᠮᠠᠭᠠᠭᠠᠭ /gvamak/	ᠮᠠᠭᠠᠭᠠᠭ /ʔemak/	ᠮᠠᠭᠠᠭᠠᠭ /ʔimak/
Universal	ᠮᠠᠭᠠᠭ /ʔelak/, ᠮᠠᠭᠠᠭᠠᠭ /ʔelanjak/, ᠮᠠᠭᠠᠭᠠᠭ /ʔelamak/		ᠮᠠᠭᠠᠭᠠᠭ /ʔe(ʔ)elak/	
Collective	ᠮᠠᠭᠠᠭᠠᠭ /ʔenjak/			
Deital	ᠮᠠᠭᠠᠭᠠᠭᠠᠭ /veʔanjak/			

Indefinite pronouns generally refer to anything and are not specific, so ‘ᠮᠠᠭᠠᠭ’ means (some)one. Opposed to that demonstrative pronouns refer to something specific similar to how indefinite and definit articles function, so ‘ᠮᠠᠭᠠᠭᠠᠭ’ means this(one). Negative pronouns are a type of indefinite pronoun that simply negates the meaning, so ‘ᠮᠠᠭᠠᠭ’ means no(o)ne. Interrogative pronouns are used for questions where an object is expected to be the answer like with ‘who’ or ‘what’. One can use a pronoun declined in the objective case and place it in the locative position for locative use cases like ‘ᠮᠠᠭᠠᠭᠠᠭ’ meaning here or ‘ᠮᠠᠭᠠᠭᠠᠭ’ meaning where. It has to be noted that there is a difference between ‘ᠮᠠᠭᠠᠭᠠᠭ’ and ‘ᠮᠠᠭᠠᠭᠠᠭᠠᠭ’ where the latter is specifically for locations of people.

IV.3.3 Relative pronouns

In rare cases interrogative pronouns can be used as relative pronouns, but using ‘ᠮᠠᠭᠠᠭ’ or an article like ‘ᠮᠠᠭ’ or ‘ᠮᠠᠭᠠᠭ’ is more common.

V Name System

The Laevanaak Name System includes five different types of names a person can have, of which in some cases not every is used, but always have the same order. Most Laevanaak names are written within the appropriate foreign script.

The first and most important name is the **Given Name**, which always has to appear in a full name. It is used to differentiate different people and give an individual person an identity. Such a name does not always have a meaning, but if they have it is most of the time due to being a literal translation of a name from a different culture. For example ‘ᠠᠯᠠᠭᠠᠨ’ derives from the literal translation of Charlotte or Charles meaning free person. Other names derived from different cultures names can also be simple transliterations. For example ‘ᠲᠣᠮᠤ’ most likely comes from Thomas. Names of native Laevanaak origin like ‘ᠲᠤᠨᠤ’ or ‘ᠲᠤᠨᠤ’ have lost their original meaning most of the time. Only in rare instances like ‘ᠲᠤᠨᠤ’ have they kept their similarity and connotation with a meaning.

The second name is the **Genus Name**, which is often mistakenly assumed to be some kind of family or last name, instead it functions as a descriptive name often referring to physical or personal properties like hair color or personality type. Often a genus name is changed multiple times in life. Usually a genus name is derived from a Laevanaak root and therefore is often written in Laevanaak.

The third name is the **Relation Name**, which always consists of the given name of an important person like partner or parent and the fitting suffix. The most common types of relation names are for a partner ending in ‘-ᠠᠨᠠᠭᠤ’ and for a close friend ending in ‘-ᠠᠨᠠᠭᠤ’.

The fourth name is the **Glottic Name**, which is the least common type even having declined in usage over the last decades. It is used to identify with the most familiar language and connecting to a larger group of similar people through a common language. It also signals cultural closeness and a common base.

The fifth and last name is the **Zodiac Name**, which is a combination of the name of the birth year according to the Laevanaak Calendar and the suffix ‘-ᠠᠨᠠᠭᠤ’.

VI Number System

Numbers in Laevanaak are represented by the digits ၂, ၃, ၄, ၅, ၆ and ၇ which are written like ‘၂၇’, ‘၅၅’, ‘၇၅၇’, ‘၇၅၅’, ‘၇၅၅’ and ‘၅၅၅၅’ respectively the first six being the numerals for one through six and the seventh being the numeral for twelve.

Numerals greater than six are constructed combining two or more digits. Those digits are written out from biggest to smallest when using the number symbols. Written out in words the smaller digit is placed first for the numbers using two digits, while for numbers using three digits the digit for twelve is placed first.

Any number larger than twentythree is effectively base 24 with the places separated by ‘၂’ and the number for twentyfour itself as ၂၇ being written as ‘၅၅’. The ‘၂’ symbol is known as the numeral position marker. An infix ‘-၂-’ is placed before ‘၅၅’ if the preceding place is larger than one, for example ၃၇ is ‘၅၅၂၅၅’. If any consonant would be doubled, the second is dropped. Likewise if any vowel would appear twice in a row, it is simplified to one instance followed by an ‘U’. For example ၅၅ is written as ‘၇၅၅၅’ and ၂၇၇ as ‘၅၅၅၅’.

Ordinal Numbers are represented with the prefix ‘၇၅၅-’ or rarely the address marker when represent with number symbols.

Numeral	Symbol	Written out	Numeral	Symbol	Written out
0		၇၅၅၅	16	၇၅	၇၅၅၅၅၅၅၅
1	၂	၅၅	17	၇၅၅	၇၅၅၅၅၅၅၅
2	၃	၅၅	18	၇၅၅	၅၅၅၅၅၅၅၅
3	၄	၇၅၅၅	19	၇၅၅	၅၅၅၅၅၅၅၅၅၅
4	၅	၇၅၅	20	၇၅၅	၅၅၅၅၅၅၅၅၅၅
5	၆	၇၅၅	21	၇၅၅	၅၅၅၅၅၅၅၅၅၅၅၅
6	၇	၅၅	22	၇၅၅	၅၅၅၅၅၅၅၅၅၅၅၅
7	၈	၅၅၅၅	23	၇၅၅	၅၅၅၅၅၅၅၅၅၅၅၅
8	၉	၅၅၅၅	24	၂၇	၅၅
9	၁၀	၇၅၅၅၅၅	25	၂၇၇	၅၅၅၅
10	၁၁	၇၅၅၅၅	26	၂၇၇	၅၅၅၅
11	၁၂	၇၅၅၅၅	48	၃၇	၅၅၅၅၅၅
12	၁၃	၅၅၅၅	72	၅၇	၇၅၅၅၅၅၅၅
13	၁၄	၅၅၅၅၅၅	96	၆၇	၇၅၅၅၅၅
14	၁၅	၅၅၅၅၅၅	288	၇၇	၅၅၅၅၅၅၅၅
15	၁၆	၇၅၅၅၅၅၅၅	576	၇၇၇	၅၅၅၅

[illegible]

In some cases shorthands for fractions of specific powers of twentyfour can be used. Generally the amount of horizontal lines following a fraction symbol combined with a subscript numeral position marker ‘ $\underset{\circ}{\sim}$ ’ indicate the power of twentyfour.

‘ $\text{༤༤}^{\text{ལྔ་ལྔ་ལྔ་ལྔ་ལྔ་}$ ’ is a shorthand for ༤༤ and means one twentyfour.

‘ λ_{576} ’ is shorthand for λ_{576} and means one 576th.

ζ_{13824} ‘ ζ_{13824} ’ is shorthand for $\zeta_{(1^4 1^4 1^4)}$ and means one 13824th.

The only smaller fractions that have shorthands are ‘ $\frac{1}{16}$ ’ for the sixth power, ‘ $\frac{1}{8}$ ’ for the ninth power and ‘ $\frac{1}{4}$ ’ for the twelfth power.

VII.3 Other Common Things to Say

[illegible]

VII.4 Idioms

[illegible]

VIII Dialectal Variation

VIII.1 Sailor Dialects

Sailor dialects are dialects of Laevanaak spoken by sailor and fishing communities over large areas of the ocean helping people from different islands speaking different dialects to communicate more easily. These dialects are seen as a more standard version of the local dialect group or even the general language. Most of sailor dialects are very simplified and lack unique features.

VIII.1.1 Standard Modern Laevanaak

The Central Sailors Dialect, East Alnağaemak Dialect or also known as Standard Modern Laevanaak is the main sailors dialect of the central island group in Enkavak as well as the coastal area of Enkavaks capital city Alnağaemak. It is known for being the standard version of Laevanaak used by the Atlantic government and most official organisations. Its vast simplicity in grammar, vocabulary and phonology makes it easy to learn.

Its vowels /e/ and /a(:)/ are merged to /a~a(:)/ while /ε/ and /ɪ/ lack distinction as well. Its glottal stop is often considered phonetic instead of phonemic, /t̚/ is sometimes realised as [lv] by learners or non natives and /t̚/ is sometimes disregarded entirely or just broken down to /k̚/. Note that /k̚/ is not an affricate but rather two phonemes with separate releases in realisation.

Standard Modern Laevanaak uses the standard foreign script for names and loanwords.

VIII.1.2 Other Sailors Dialects

Other Sailors Dialects are generally similar to the Central Sailors Dialect, but can have subtle distinctions such as more phonemes, a different case system and more distinct personal pronouns. The use of a foreign alphabet is almost always done differently. Sailors Dialects usually appear to have similar features as surrounding non-Sailors Dialects, which usually distinguishes them further from the standard.

VIII.2 Central Dialects

Central Dialects are usually the closest to the standard in terms of phonology, but often have very different grammatical features with a lot of agglutination.

VIII.3 Eastern Dialects

Eastern Dialects often have a lot more different vowels than other dialect groups. Depending on the subdialect group other features can include umlauts, nasals or even ejectives. This often leads to modifications to the Laevanaak alphabet such as diacritics or different letters. Most dialects use the Greek alphabet as their foreign alphabet or don't use a foreign alphabet at all.

VIII.4 Western Dialects

The most prominent feature of Western Dialects are tones and a large amount of loans from Germanic language. Some Western Dialects also have some form of ergativity.

IX Dictionary

IX.1 Usage

Every entry contains the spelling in Laenavaak, the standard phonemic pronunciation, the part of speech and the meaning. The part of speech is one of the following abbreviations:

<i>n.</i>	noun	<i>v.</i>	verb
<i>art.</i>	article	<i>adj.</i>	adjective
<i>adv.</i>	adverb	<i>pron.</i>	pronoun
<i>prep.</i>	preposition	<i>conj.</i>	conjunction
<i>part.</i>	particle	<i>numeral</i>	numeral
<i>name</i>	name	<i>suffix</i>	suffix

Additional grammatical information is placed in bold below the first line. If a word has multiple meanings, they are split into separate lines, which are numbered on their left. Transitivity for both verbs and prepositions is marked with a '+' in front of the respective meaning and the abbreviation of the case or part of speech it goes with.

If a word is irregular in its morphology, the endings of the irregular forms are placed after the pronunciation. This – as well as entries marked as suffixes – use '⟨' (the reverse comma) as a suffix marking symbol like one would use '-' in english.

Example /pronunciation/ <form1>⟨form2 part of speech
grammatical information

1. + CASE meaning 1
2. + CASE meaning 2

If the entry is a variation or different spelling of another entry, it only contains the spelling in Laenavaak, the standard phonemic pronunciation and the spelling of the entry it refers to.

Example /pronunciation/ → **Other Entry**
