I Preface

This documentation explains the usage of the Laevanaak Language as of the government of Enkavak for the purpose of increasing literacy, understanding and studies on it. The Ministry of Education hopes for this documentation to be a basis for a more standardized Laevanaak for both the usage in politics and educational institutions.

Laevanaak is the most dominant language throughout the islands of the Atlantic Sea as well as different remote locations and cities. It is used officially by the governments of Enkavak and Gevsaksavli and the international organisations NATO and the Gulf Union. The assigned language code is 'LVK' as issued by the United Nations Office of Codes and Document Standardization or 'LV' as used by the Enkavak government or other official atlantic institutions.

Laevanaak as well as related languages like Kaarratosk or Navnaak is part of the Laevanaic Language Family. More specifically the dialect described herein is referred to as Standard Modern Laevanaak, which is mainly spoken on islands such as Gasangak or Njismgak and parts of Alnaaemak. Laevanaak has a high dialectal diversity due to the immediate geography consisting of nearly only ocean and its islands, which separated speakers for centuries yielding several distinguished languages and dialects.

Over the span of the different time periods the Atlantic people had contact with Graecic, Pisco-Imerchali, Saxo-Syzkynic and most recently Kozramvan people which helped shaping the Laevanaak Language to what it is today. In modern times the contact to other cultures has expanded due to the globalisation with the most influencing being Kyawcenni, German, Kozramva and Mosici.

II Phonology and Orthography

II.1 Common and Uncommon Sounds

The most common sounds in Laevanaak can be represented by the Laenavaak script and are found in the most common words. Less common sounds are represented in other scripts depending on the dialect.

Figure 1: Laevanaak vowels

The different vowels are based on two main vowels in the standard dialect and are only differentiated by length most of the time. In most of the dialects, the short version of /ε/ can be represented by /ɪ/ and is more differentiated than in the standard dialect. In a similar manner can /e/ merge with /a/, be differentiated or even split into more different vowels depending on the dialect.

	Labial	Alveolar	Velar	Glottal
Stop			/k/ /g/	/ʔ/
Nasal	/m/	/n/	/ŋ/	
Fricative	/v/	/ɸ/		
Affricative		/tɸ/		
Approximant		/l/		

Table 1: Laevanaak Consonants

In some instances or dialects can certain sounds be pronounced differently. /k/ can become [q], /v/ can become [f] or /ɸ/ can become [ɕ]. The lateral alveolar affricate is mostly used in loanwords and only rarely occurs in names or native nouns. In some dialects it can be pronounced as [d]. In most cases if a consonant is doubled, it can be pronounced as if gemminated, which also sometimes applies to vowels. So for example 𐌶𐌵𐌹𐌺𐌻𐌹𐌺𐌹 /ʔe.ɸl.lak/ (toe) would be [ʔe.ɸl:.ak] or 𐌶𐌵𐌹𐌺𐌻𐌹𐌺𐌹𐌹 /vɛ.ɛk/ (stars) would be [vɛ:k].

Every vowel is always preceded by a consonant. If not specified, that consonant is simply a glottal stop.

/ʈ/	ᳵ, ᳶ, ᳷, ᳸, ᳹	Θθ, Σσς	Ss
/tʰ/	ᳺ, ᳻	Δδ, Ζζ, Ξξ, Ττ	Tt, Dd
/l/	᳼, ᳾, ᳿, ᳽	Δδ, Λλ, Ρρ	Dd, Ll, Rr
/ɛ̃/	᳽, ᳾, ᳿	Ιι	Ii, Yy
/ε/	᳽, ᳾	Εε, Ηη	Ee
/a/	᳽, ᳾	Αα	Aa
/a:/	᳽	Αα αα	Aa aa
/e/	᳽, ᳾, ᳿, ᳽, ᳾, ᳿, ᳽, ᳾	Οο, Ωω, Υυ	Oo, Uu

II.4 Punctuation

There is a lot of different symbols in Laevanaak used for punctuation and markings.

Middledots (◌◌) are placed between words to differentiate between them. They are only used if there is not already another symbol.

Full Stops (◌) are placed at the end of a sentence to conclude it.

Commas (◌) are placed before a Subordinate, Coordinate clause or an AcI. If the clause does not conclude the sentence, it is also followed by a comma.

Interjection Markers (◌) are used to mark full sentences or phrases that are placed within another sentence to add more information. They are placed before and after that interjected sentence or phrase instead of full stops or middledots. Interjection markers are also used in date formatting.

Quote Markers (◌) are placed before and after quotes.

Abbreviation Markers (◌) are placed after an abbreviation.

Name Markers (◌) are placed before and after names to mark them as such.

Additionally there are still other symbols like the **Reverse Comma** (◌), the **Address Marker** (◌) or the **Triple Dot Marker** (◌◌◌) used in specific situations or to replace other symbols in certain cases.

ዘላዘዘ	ሀዕሃላጌጌጌጌ	ሶዕዕሶሃጌ	ሃፃሃጉ	ጌ	ዘላዘዘ	ጌዘፃዘዘ	ፍጌፍጌ
/ʔɛ.nɛk	ʔɛ.ʔɪ.na.ka.ʔɛk	nɛ.mɛ.nɪ.ak	ʔɪ.vɪm	ʔa	ʔɛ.nɛk	vɛ.vɛk	ka.va.ʔak
INDEF	dog-PL-NOM	lively	be-3PL	CNJ	INDEF	fish-PL-NOM	wet

ሃፃሃጉ
ʔɪ.vɪm/
be-3PL

'Dogs are lively and fish are wet.'

The conjunction ‘ጌ’ can be used to combine two clauses linking their semantics without making them semantically dependent on each other, instead it indicates that both clauses are temporally correlating in either way:

ጌ	ፍፃሚ	ሮሃዘዘሃርዘዘ	ጌሃፃፃ	ጌ	ጌ	ጌ	ጌ	ዘጌሃፃፃ
/mak	gvɛŋ	lɪ.lɛ.kɪ.gɛŋ	mɪ.ʔɪ.va	ʔavn	mak	ʔaŋ	gvla	ʔɛ.ŋɪ.va/
1S-NOM	DEF	bread-PL-OBJ	take-1S	then	1S-NOM	one	later	eat-1S

'I take the breads, then I eat one.'

This sentence will keep its meaning when switching the clauses:

ጌ	ጌ	ጌ	ዘጌሃፃፃ	ጌ	ጌ	ፍፃሚ	ሮሃዘዘሃርዘዘ	ጌሃፃፃ
/mak	ʔaŋ	gvla	ʔɛ.ŋɪ.va	ʔavn	mak	gvɛŋ	lɪ.lɛ.kɪ.gɛŋ	mɪ.ʔɪ.va/
1S-NOM	one	later	eat-1S	after	1S-NOM	DEF	bread-PL-OBJ	take-1S

'I eat one after I took the breads.'

In contrast subjunctive clauses convey a more conditional linkage:

ጌጌ	ዘላዘዘ	ሶዘሀሮሃጌ	ጌፃፃ	ጌ	ጌጌ
/mamk	ʔɛ.nak	nɛ.ʔɛ.lɪ.ak	ʔam	ʔav	mamk
3S-NOM	INDEF	dictator-NOM	be-3S	because	3S-NOM

ጌጌጌ ጌጌሀሀሀሀሀሀሀሀ
ma.ʔɛ ʔav.nɛ.ʔɛl.nan.vam/
earlier win – 3S

'They are a dictator, because they won a war.'

Relative clauses are placed after the word they refer to. The structure of the nominal relative clause is the same as in a main clause (SOV(O)) with the relative pronoun in the nominative as the subject:

ላጌ	ጌጌጌ	ላጌ	ጌጌጌ	ጌጌጌጌጌጌ	ፍዕላላጌጌጌ	ዘላዘዘ	ጌጌጌ
/nak	ʔa.ŋak	nak	gvɛŋ	ʔɛ.mɛ.ʔaŋ	kɛ.nan.vam	ʔɛ.nak	ma.mɪ
ART	person-NOM	REL-NOM	DEF	house-OBJ	own-3S	INDEF	parent-NOM

ላጌ ጌጌጌ ጌጌጌጌጌ ጌጌጌጌ
nɛg klaŋ nɪ.nɪ.ɛg ʔam/
ART three child-PL-GEN be-3S

'The person, who owns this house, is a parent of three children.'

The structure of the objectal relative clause is OSV(O) with the relative pronoun as the first object:

ላጌ	ጌጌጌ	ላጌ	ጌጌ	ዘፃ	ጌጌጌ	ዘጌጌጌ	ላጌ	ጌጌጌ
/nak	ʔa.ŋak	naŋ	mak	ʔɛv	gɛl	ʔɛm.va	nag	ʔɛ
ART	person-NOM	REL-OBJ	1S-NOM	while	yesterday	see-1S	ART	river

ጌጌጌጌጌጌጌ
gɛ.nɪ.vam/
walk-3S

'The person, whom I saw yesterday, walks by the river.'

The subject of an objectal relative clause can be left missing, in which case it is assumed to be the same as the subject of the main clause:

ᑭᓂᐱ	ᑭᓂᐱᑦ	ᓂᑦᑭᓂᐱᑦ	ᑭᓂᐱᑦ	ᑭᓂᐱᑦᑭᓂᐱᑦ	ᑭᓂᐱᑦ
/mak	gvan	?a.ŋaŋ	naŋ	na:.mɪ.va	?ɛm.va/
1S-NOM	DEF	person-OBJ	REL-OBJ	like-1S	see-1S

'I see the person, whom I like.'

III.4 Negation and Question Marking

Laevanaak uses adverbs to mark negations or questions. 'ᑦᑭ' is used for the negation of a sentence or verb:

ᑭᓂᐱ	ᑭᓂᐱ	ᑭᓂᐱ	ᑦᑭ	ᑭᓂᐱᑦ
/gvak	vak	mig	ŋe	?ɪ.vam/
DEF	animal-NOM	big	NEG	be-3S

'This animal is not big.'

'ᑭᓂᐱ' can be used to mark either the confirmation or more prominently the negation of a negated sentence or question:

ᑭᓂᐱ	ᑭᓂᐱ	ᑭᓂᐱ	ᑭᓂᐱ	ᑭᓂᐱᑦ
/gvak	vak	mig	ʔe	?ɪ.vam/
DEF	animal-NOM	big	really	be-3S

'No, this animal is big.'

'ᑭᓂᐱ' or another interrogative adverb can be used to mark a question:

ᑭᓂᐱ	ᓂᑦᑭᓂᐱ	ᓂᑦᑭᓂᐱᑦ	ᑭᓂᐱ	ᑭᓂᐱᑦ
/gvak	?a.ŋak	?im.nɪ.a.ʔak	ga.ɪ	ʔam/
DEF	person-NOM	imniahk	IM	be-3S

'Is this person Charlotte?'

If the question includes an interrogative pronoun for the questioned part, the interrogative adverb is no longer needed but still used often:

ᑭᓂᐱ	ᓂᑦᑭᓂᐱ	ᓂᑦᑭᓂᐱ	ᑭᓂᐱᑦ
/gvak	?a.ŋak	ʔɪ.ŋak	ʔam/
DEF	person-NOM	WH-NOM	be-3S

'Who is this person?'

III.5 Tense Marking

Laevanaak doesn't use conjugation for tense marking, rather like with negation or questions it is done with adverbs. Commonly used are 'ᑭᓂᐱ' for near future, 'ᑭᓂᐱᑦ' for general future, 'ᑭᓂᐱᑦ' for broad present, 'ᑭᓂᐱᑦ' for near past and 'ᑭᓂᐱ' for general past. These can be combined with more specific temporal adverbs to specify the details.

III.6 Noun Conjunction

In Laevanaak some conjunctions can be used to combine nouns in different manners, where as 'ᑭᓂᐱ' is the one used the most, primarily for listing of nouns. A noun that is a combination of multiple conjuncted nouns is considered plural and therefore its verb has to be plural as well, even if all of the conjuncted nouns are singular.

ዘላዘላ ቶዘቶዘላ ዘ ዘላዘላ ገሃርዘላ ዘላዘላ ርዕረዘላ
 /ʔɛ.nɛk mɛ.mɛk ʔɛ ʔɛ.nɛk ki.gɛk ʔɛ.nɛk ga.ʔa.ɲɛ.ɛk
 INDEF banana-PL-NOM CNJ INDEF cake-PL-NOM INDEF tasty
 ዘገሃዘላ ህፃሃቶ
 ʔɛ.ɲɪ.vɛk ʔim/
 food-PL-NOM be-3PL
'Bananas and cakes are tasty food.'

Conjunctions like '፡' cannot be used for joining nouns as well as conjunctions used to join nouns cannot be used to join clauses.

In more modern texts, if more than two nouns are listed, a comma can be used instead of a conjunction between every but the last two nouns. This may be an influence from German.

ወዘርዕ ወሃታዕ ዘ ወሃዘላዕ ላዘላ ርዕረዘላ ፍፃሜ ርዘላዕ ህፃሃቶ
 /ʔɛ.ga li.ma ʔɛ ɲɛ.ʔɛ nɛk ɲaɲ.ʔɛk gvag lɛ.na.va:g ʔim/
 ega lima CNJ ngeso ART letter-PL-NOM DEF lenavaak-GEN be-3PL
'Ega, Lima and Ngeso are letters of the Laenavaak Alphabet.'

III.7 Topic Marking

Topic marking in Laevanaak is quite rare but can be used as a replacement for verbal passive. It is done by moving the marked word phrase to the beginning of the clause. This can be done to the subject, an object or a prepositional phrase.

ታገላ ታገገላ ፀረገገገገገገገገገ
 /maɲ mavk vlavameʔav/
 1S-OBJ 2S-NOM talk-2
'It is me, that you talk to.'

If one wants to leave the subject of the clause open like it is done with a verbal passive, 'ገገገገ' or 'ገገገ' can be used.

ላገላ ርዘዘገላ ገገገገ ዘገሃዘላ ህ ላገላ ዘገሃዘላ
 /naɲ ɲɛvaɲ ʔaɲak ʔɛɲivam ʔa naɲ ʔɛmɪaɲ
 ART-OBJ bread-OBJ INDEF.ANIM-NOM eat-3 CNJ ART-OBJ juice-OBJ
 ገገገገ ላገገገገገገገገ
 ʔaɲak nallavam/
 INDEF.ANIM-NOM drink-3
'Bread is eaten and juice is drunk.'

Rather colloquially the subject can also be entirely dropped.

ላገላ ርዘዘገላ ዘገሃዘላ ህ ላገላ ዘገሃዘላ ላገገገገገገገገ
 /naɲ ɲɛvaɲ ʔɛɲivam ʔa naɲ ʔɛmɪaɲ nallavam/
 ART-OBJ bread-OBJ eat-3 CNJ ART-OBJ juice-OBJ drink-3
'Bread is eaten and juice is drunk.'

IV Morphology

Laevanaak uses suffixes for declension, conjugation and other usages. Nouns, pronouns, articles and adjectives are declined and verbs are conjugated.

IV.1 Declension

IV.1.1 Nouns

Nouns are declined in case and number in two different patterns. Nouns ending in ‘-a’ are declined according to the A-Declension and nouns ending in ‘-u’ are declined according to the H-Declension.

	Singular	Plural
Nominative	-ᐱᐅ /ak/	-ᐱᐅ /εk/
Genitive	-ᐱᐅ /ag/	-ᐱᐅ /εg/
Objective	-ᐱᐅ /aŋ/	-ᐱᐅ /εŋ/

Table 3: A-Declension

	Singular	Plural
Nominative	-ᵛᵛᵛ /aʔak/	-ᵛᵛᵛᵛ /εʔεk/
Genitive	-ᵛᵛᵛᵛ /aʔag/	-ᵛᵛᵛᵛᵛ /εʔεg/
Objective	-ᵛᵛᵛᵛᵛ /aʔaŋ/	-ᵛᵛᵛᵛᵛᵛ /εʔεŋ/

Table 4: H-Declension

The nominative is used for the subject of a clause, the object of a clause if the verb is a form of to be and for names and calling them.

The objective can be used as a direct or indirect objective case as object of a clause or the subject of an Acl. It can also be used as a locative if placed after a verb.

The genitive can be used to describe a noun if placed after it, in which case it can be locational, partitive or most commonly possessive. It can also be used as a genitive object depending on the verb. It can also rarely be used informally or in dialects after a verb similarly to an objective for a direction marker.

IV.1.2 Adjectives

Adjectives are also declined in the same two declensions with the same endings depending on the ending. Additionally they can be declined in comparison with prefixes.

Negative	Positive	Comparative	Superlative
ḡid- /ɣe/	-	ḡid- /te/	ḡid- /ge/

Table 5: Adjective Comparison

The suffix ‘ᐱᐱᐱ’ /a.ʔɪ/ for the A-Declension or ‘ᐱᐱᐱᐱ’ /a.ʔa.ʔɪ/ for the H-Declension are added to use the word as an adverb. ‘ᑕᐱᐱᐱ’ /ga.ʔak/, lit. ‘good’, will become ‘ᑕᐱᐱᐱᐱ’ /ga.ʔa.ʔɪ/, lit. ‘goodly’ or ‘in a good way’.

The suffix ‘*ᠠᠨᠭᠢᠨ*’ /a.ɬem.n/ for the A-Declension or ‘*ᠠᠨᠭᠢᠨᠠ*’ /a.ʔa.ɬem.n/ for the H-Declension can be placed after the adjective and followed by a usual suffix of the A-Declension to create a passive form of an adjective. This can be used to create a participle passive form of a verb. For example ‘*ᠭᠡᠨᠠᠪᠶ᠋ᠦᠮᠠᠨᠠᠭᠤᠨ*’ /ke.na.vek.ve.ma.ɬem.nak/ from the verb for to

V Name System

The Laevanaak Name System includes five different types of names a person can have, of which in some cases not every is used, but always have the same order. Most Laevanaak names are written within the appropriate foreign script.

The first and most important name is the **Given Name**, which always has to appear in a full name. It is used to differentiate different people and give an individual person an identity. Such a name does not always have a meaning, but if they have it is most of the time due to being a literal translation of a name from a different culture. For example ‘ᠠᠯᠠᠭᠠᠨ’ derives from the literal translation of Charlotte or Charles meaning free person. Other names derived from different cultures names can also be simple transliterations. For example ‘ᠲᠣᠮᠤ’ most likely comes from Thomas. Names of native Laevanaak origin like ‘ᠲᠤᠨᠤ’ or ‘ᠲᠤᠨᠤ’ have lost their original meaning most of the time. Only in rare instances like ‘ᠲᠤᠨᠤ’ have they kept their similarity and connotation with a meaning.

The second name is the **Genus Name**, which is often mistakenly assumed to be some kind of family or last name, instead it functions as a descriptive name often referring to physical or personal properties like hair color or personality type. Often a genus name is changed multiple times in life. Usually a genus name is derived from a Laevanaak root and therefore is often written in Laevanaak.

The third name is the **Relation Name**, which always consists of the given name of an important person like partner or parent and the fitting suffix. The most common types of relation names are for a partner ending in ‘-ᠠᠨᠠᠭᠤ’ and for a close friend ending in ‘-ᠠᠨᠠᠭᠤ’.

The fourth name is the **Glottic Name**, which is the least common type even having declined in usage over the last decades. It is used to identify with the most familiar language and connecting to a larger group of similar people through a common language. It also signals cultural closeness and a common base.

The fifth and last name is the **Zodiac Name**, which is a combination of the name of the birth year according to the Laevanaak Calendar and the suffix ‘-ᠠᠨᠠᠭᠤ’.

VI Number System

Numbers in Laevanaak are represented by the digits ၂, ၃, ၄, ၅, ၆ and ၇ which are written like ‘၂၇’, ‘၅၅’, ‘၇၅၇’, ‘၇၅၅’, ‘၇၅၅’ and ‘၅၅၅၅’ respectively the first six being the numerals for one through six and the seventh being the numeral for twelve.

Numerals greater than six are constructed combining two or more digits. Those digits are written out from biggest to smallest when using the number symbols. Written out in words the smaller digit is placed first for the numbers using two digits, while for numbers using three digits the digit for twelve is placed first.

Any number larger than twentythree is effectively base 24 with the places separated by ‘၂’ and the number for twentyfour itself as ၂၇ being written as ‘၅၅’. The ‘၂’ symbol is known as the numeral position marker. An infix ‘-၂-’ is placed before ‘၅၅’ if the preceding place is larger than one, for example ၃၇ is ‘၅၅၂၅၅’. If any consonant would be doubled, the second is dropped. Likewise if any vowel would appear twice in a row, it is simplified to one instance followed by an ‘U’. For example ၅၅ is written as ‘၇၅၅၅’ and ၂၇၇ as ‘၅၅၅၅’.

Ordinal Numbers are represented with the prefix ‘၇၅၅-’ or rarely the address marker when represent with number symbols.

Numeral	Symbol	Written out	Numeral	Symbol	Written out
0		၇၅၅၅	16	၇၅	၇၅၅၅၅၅၅၅
1	၂	၅၅	17	၇၅၅	၇၅၅၅၅၅၅၅
2	၃	၅၅	18	၇၅၅	၅၅၅၅၅၅၅၅
3	၄	၇၅၅၅	19	၇၅၅	၅၅၅၅၅၅၅၅၅၅
4	၅	၇၅၅	20	၇၅၅	၅၅၅၅၅၅၅၅၅၅
5	၆	၇၅၅	21	၇၅၅	၅၅၅၅၅၅၅၅၅၅၅၅
6	၇	၅၅	22	၇၅၅	၅၅၅၅၅၅၅၅၅၅၅၅
7	၈	၅၅၅၅	23	၇၅၅	၅၅၅၅၅၅၅၅၅၅၅၅
8	၉	၅၅၅၅	24	၂၇	၅၅
9	၁၀	၇၅၅၅၅၅	25	၂၇၇	၅၅၅၅
10	၁၁	၇၅၅၅၅	26	၂၇၇	၅၅၅၅
11	၁၂	၇၅၅၅၅	48	၃၇	၅၅၅၅၅၅
12	၁၃	၅၅၅၅	72	၅၇	၇၅၅၅၅၅၅၅
13	၁၄	၅၅၅၅၅၅	96	၆၇	၇၅၅၅၅၅
14	၁၅	၅၅၅၅၅၅	288	၇၇	၅၅၅၅၅၅၅၅
15	၁၆	၇၅၅၅၅၅၅၅	576	၇၇၇	၅၅၅၅

In some cases shorthands for fractions of specific powers of twentyfour can be used. Generally the amount of horizontal lines following a fraction symbol combined with a subscript numeral position marker ‘_o’ indicate the power of twentyfour.

ζ_{13824} ‘ ζ_{13824} ’ is shorthand for $\zeta_{(1^4 1^4 1^4)}$ and means one 13824th.

The only smaller fractions that have shorthands are ‘ $\frac{1}{16}$ ’ for the sixth power, ‘ $\frac{1}{25}$ ’ for the ninth power and ‘ $\frac{1}{36}$ ’ for the twelfth power.

VII.4 Idioms

Laevanaak	English	Notes
၁၂ဝ၄၉၁၉၁၉ ဟိုဝါ၁၄၁၄၁၄၁၄	because of obvious reasons "	colloq. formally correct version of ‘၁၂ဝ၄၉၁၉၁၉’, this version of the phrase is usually consid- ered prescriptivist and rude.

VIII Dialectal Variation

VIII.1 Sailor Dialects

Sailor dialects are dialects of Laevanaak spoken by sailor and fishing communities over large areas of the ocean helping people from different islands speaking different dialects to communicate more easily. These dialects are seen as a more standard version of the local dialect group or even the general language. Most of sailor dialects are very simplified and lack unique features.

VIII.1.1 Standard Modern Laevanaak

The Central Sailors Dialect, East Alnaŋaemak Dialect or also known as Standard Modern Laevanaak is the main sailors dialect of the central island group in Enkavak as well as the coastal area of Enkavaks capital city Alnaŋaemak. It is known for being the standard version of Laevanaak used by the Atlantic government and most official organisations. Its vast simplicity in grammar, vocabulary and phonology makes it easy to learn.

Its vowels /e/ and /a(:)/ are merged to /a~a(:)/ while /ε/ and /ɪ/ lack distinction as well. Its glottal stop is often considered phonetic instead of phonemic, /t̚/ is sometimes realised as [lv] by learners or non natives and /t̚/ is sometimes disregarded entirely or just broken down to /k̚/. Note that /k̚/ is not an affricate but rather two phonemes with separate releases in realisation.

Standard Modern Laevanaak uses the standard foreign script for names and loanwords.

VIII.1.2 Other Sailors Dialects

Other Sailors Dialects are generally similar to the Central Sailors Dialect, but can have subtle distinctions such as more phonemes, a different case system and more distinct personal pronouns. The use of a foreign alphabet is almost always done differently. Sailors Dialects usually appear to have similar features as surrounding non-Sailors Dialects, which usually distinguishes them further from the standard.

VIII.2 Central Dialects

Central Dialects are usually the closest to the standard in terms of phonology, but often have very different grammatical features with a lot of agglutination.

VIII.3 Eastern Dialects

Eastern Dialects often have a lot more different vowels than other dialect groups. Depending on the subdialect group other features can include umlauts, nasals or even ejectives. This often leads to modifications to the Laevanaak alphabet such as diacritics or different letters. Most dialects use the Greek alphabet as their foreign alphabet or don't use a foreign alphabet at all.

VIII.4 Western Dialects

The most prominent feature of Western Dialects are tones and a large amount of loans from Germanic language. Some Western Dialects also have some form of ergativity.

IX Dictionary

IX.1 Usage

Every entry contains the spelling in Laenavaak, the standard phonemic pronunciation, the part of speech and the meaning. The part of speech is one of the following abbreviations:

<i>n.</i>	noun	<i>v.</i>	verb
<i>art.</i>	article	<i>adj.</i>	adjective
<i>adv.</i>	adverb	<i>pron.</i>	pronoun
<i>prep.</i>	preposition	<i>conj.</i>	conjunction
<i>part.</i>	particle	<i>numeral</i>	numeral
<i>name</i>	name	<i>suffix</i>	suffix

Additional grammatical information is placed in bold below the first line. If a word has multiple meanings, they are split into separate lines, which are numbered on their left. Transitivity for both verbs and prepositions is marked with a '+' in front of the respective meaning and the abbreviation of the case or part of speech it goes with.

If a word is irregular in its morphology, the endings of the irregular forms are placed after the pronunciation. This – as well as entries marked as suffixes – use '⟨' (the reverse comma) as a suffix marking symbol like one would use '-' in english.

Example /pronunciation/ <form1>⟨form2 part of speech
grammatical information

1. + CASE meaning 1
2. + CASE meaning 2

If the entry is a variation or different spelling of another entry, it only contains the spelling in Laenavaak, the standard phonemic pronunciation and the spelling of the entry it refers to.

Example /pronunciation/ → **Other Entry**
